## SAFE A&T Technology Sets up Modern Plant to Manufacture Refrigeration Accessories

Artists impression of new Dry All production facility in Dombivali, just outside Mumbai

Established in 1991, Dry All started making receiver driers for automobile air conditioners, soon added liquid line filter driers for commercial air conditioner and still later suction line accumulators, suction line filter driers, receivers, oil separators and heat exchanger accumulators. With stringent process control and quality checks, the product enjoys the confidence of leading OEMs in India and abroad.

As the largest Indian manufacturer of a fairly comprehensive range of R22 and hydrofluorocarbon refrigerant line accessories, the company has now moved into a manufacturing facility in Dombivali on the outskirts of Mumbai with a covered area of 2100 m<sup>2</sup> and a production capacity of 50,000 units/month on a single shift basis.

The company behind the Dry All brand is SAFE A&T Technology.

Dear Friend,

Pleased to inform you that SAFE A&T Technology, manufacturer of **Dry All** brand of products was featured in JARN issue dated September 25, 2008.

**JARN is the most prestigious HVAC News Magazine from Japan.**
